

1) The main objective of the study is to determine the effect of the independent variable on the dependent variable. The study is designed to test the following hypotheses:

1) The mean of the dependent variable is significantly different from zero. 2) The variance of the dependent variable is significantly different from zero. 3) The distribution of the dependent variable is normal. 4) The distribution of the dependent variable is symmetric. 5) The distribution of the dependent variable is unimodal. 6) The distribution of the dependent variable is bell-shaped. 7) The distribution of the dependent variable is smooth. 8) The distribution of the dependent variable is continuous. 9) The distribution of the dependent variable is discrete. 10) The distribution of the dependent variable is mixed.

DEPARTMENT OF ENERGY INFORMATION  
CLASSIFICATION OF DOE

The Honorable Bob Dornan  
Member  
Committee on the Budget  
U.S. House of Representatives  
Washington, DC 20541

CONFIDENTIAL

The Honorable Bob Dornan  
Budget Committee  
Committee on the Budget  
U.S. House of Representatives  
Washington, DC 20541

Dear Chairman Dornan and Budget Committee Members:

DOE would like to provide you with DOE's latest information regarding the budget program for energy to provide you with the most current DOE program recommendations including expanded activities under DOE's Strategic Energy Research and Development (SERD) program. We are working with DOE to expand the program to include research and development in energy conservation, gas turbine technology, the electric utility program and the cost of production of oil and natural gas. DOE will be providing you with the information on the latest DOE program recommendations for DOE's Strategic Energy Research and Development (SERD) program.
