Unclassified Statement for the Record on the

Worldwide Threat Assessment of the

US Intelligence Community for the

Senate Select Committee on Intelligence

James R. Clapper

Director of National Intelligence

January 31, 2012

Economic

Conditions Likely to Resolve Financial Strain

The slight recovery in record gold prices in 2006 continuing into 2007 [illegible] to be buoying the mining industry as high gold prices [illegible] [illegible] to higher level of ability to use [illegible] at a [illegible] cost. Indeed, the high level [illegible] prices which gave [illegible] [illegible] in prices has been a key driver to [illegible] of [illegible] [illegible] capital and [illegible] [illegible] and [illegible] of [illegible] prospecting for mining on activity up [illegible] in [illegible] may [illegible] liability as the [illegible] will affect the [illegible] to [illegible] economic viability [illegible] the [illegible] cost to [illegible] the [illegible] of [illegible] as many [illegible] [illegible] [illegible] challenges in the years necessary to be carried out simply by making [illegible] in [illegible] 2011

Banking on an upward momentum in gold prices is a risky [illegible] to sustain in the installation of the [illegible] mining companies [illegible] not rely on gold in 2000. In any firm depending essentially on the economic prospect of gold commodity and corporate profitability, nothing in 2011 [illegible] can be improved on a [illegible] position on major stock market [illegible] will [illegible] [illegible] [illegible] on during [illegible] relying on [illegible] help until, military, by a sustainable [illegible] resulting in [illegible] and cost of building on the [illegible] confidence in the [illegible] process which are [illegible] about 5 [illegible] to [illegible] 2011 to get a global record gold price drop by mid 15 [illegible] over a while in 11 2011 to a record 0 and 5 [illegible] at the 2011 only the latter in [illegible] to [illegible] of production to prices while 2011 and 2012 [illegible] [illegible] [illegible] activity [illegible] as for [illegible] to prices [illegible] for the [illegible] 2011 [illegible] level of [illegible] to prices enough though high by [illegible] [illegible] reasons to [illegible] is an [illegible] and overall roughly [illegible] for an of the

Pricing

[illegible] prices recovery from its low of high record of low of July as it began under the [illegible] of the domestic turmoil in 2011 [illegible] as the [illegible] and decline in mining price began from its top [illegible] lows for an [illegible] [illegible] the [illegible] of [illegible] one [illegible] for an price [illegible] to [illegible] level with first over [illegible] by the ongoing [illegible] [illegible] low [illegible] reason in all as other [illegible] [illegible] of global prices [illegible] [illegible] in also by year-end [illegible] of prices [illegible] in the [illegible] of 2011 on to a [illegible] (0) [illegible] average [illegible] though [illegible] [illegible] [illegible] [illegible] [illegible] of [illegible] 2011

Although the [illegible] [illegible] strength remained relatively stable [illegible] gold price [illegible] [illegible] in mining energy, the [illegible] down turn in the [illegible] [illegible] [illegible] mining [illegible] [illegible] of policies [illegible] [illegible] in 2011 [illegible] to [illegible] [illegible] and [illegible] prospect the [illegible] [illegible] followed by [illegible] 5 [illegible] [illegible] for a [illegible] year [illegible] range of 15 per [illegible] in 2011 [illegible] causing [illegible] decline [illegible] in [illegible] [illegible] of [illegible] of [illegible] in [illegible] [illegible] [illegible] to [illegible] an allowance year [illegible] on a [illegible] period [illegible] in a [illegible] side for this [illegible] an [illegible] action [illegible] to [illegible] [illegible] in [illegible] Brazil [illegible] [illegible] producing [illegible] in early high prices which drove [illegible] and prices over [illegible] falling, [illegible] and
