1. The first step is to identify the problem.  
2. Next, we need to define the objectives.  
3. Then, we should analyze the data.  
4. After that, we can develop a plan.  
5. Finally, we should implement the plan and evaluate the results.

The first step is to identify the problem. Next, we need to define the objectives. Then, we should analyze the data. After that, we can develop a plan. Finally, we should implement the plan and evaluate the results.

11 The first step is to identify the problem. Next, we need to define the objectives. Then, we should analyze the data. After that, we can develop a plan. Finally, we should implement the plan and evaluate the results.

**Answer:**

1) The first step is to identify the problem. Next, we need to define the objectives. Then, we should analyze the data. After that, we can develop a plan. Finally, we should implement the plan and evaluate the results.
